

Number of COVID-19 cases with symptoms among the passengers on the Cruise ship (by close contact status, as of 02/19/2020)

1. This epidemic curve was created based only on those cases for which date of onset was available: 149 cases
2. The number of symptomatic cases not represented in the above graph : ①4-6 Feb:30 cases, ②7-14 Feb:21 cases, ③2/15-19 Feb:28 cases. According to the 149 cases shown in 1, the onset of above ①-③ is expected to be ①1-3 Feb, ②4-11 Feb, ③12-16 Feb, since the report date is approximately 3 days after the onset date.
