

Number of new symptomatic coronavirus infection cases and fever reports, by date of onset, Cruise Ship DP, as of February 23, 2020

- This epidemic curve was created based on symptomatic cases for which date of onset was available: 199 cases (3 cases that developed before 28th Jan were excluded from the graph)
- The number of symptomatic cases not represented in the graph : (a) 2/4-6: 31 cases(1 crew, 30 passengers), (b) 2/7-14:37 cases(15 crew, 22 passengers), (c) 2/15-23: 40 cases (12 crew, 28 passengers).
According to the 199 cases shown in 1, the onset date of (a) - (c) is expected to be (a)2/1-3, (b) 2/4-11, (c) 2/12-20, since the report date is in average 3 days after the onset date.
