

## Changes in the number of new coronavirus infection cases and fever reports on the cruise ship (as of February 19)

1. This epidemic curve was created based only on those cases for which date of onset was available: 197 cases (65%)
2. The number of symptomatic cases not represented in the above graph : ①4-6 Feb:31 cases(1 crew, 30 passengers), ②7-14 Feb:37 cases(15 crew, 21 passengers), ③25-19 Feb:36 cases(8 crew, 28 passengers). According to the 197 cases shown in 1, the onset of above ①-③ is expected to be ①1-3 Feb, ②4-11 Feb, ③12-16 Feb, since the report date is approximately 3 days after the onset date.
